Reviews

A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).

Monthly Review Press, United States, 2009. Hardback. Book Condition: New. 212 x 144 mm. Language: English . Brand New Book. Since the atomic bomb made its first appearance on the world stage in 1945, it has been clear that we possess the power to destroy our own planet. What nuclear weapons made possible, global environmental crisis, marked especially by global warming, has now made inevitable if business as usual continues. The roots of the present ecological crisis, John Bellamy Foster argues in *The Ecological Revolution*, lie in capital's rapacious expansion, which has now achieved unprecedented heights of irrationality across the globe. Foster compellingly demonstrates that the only possible answer for humanity is an ecological revolution: a struggle to make peace with the planet. Foster details the beginnings of such a revolution in human relations with the environment which can now be found throughout the globe, especially in the periphery of the world system, where the most ambitious experiments are taking place. This bold new work addresses the central issues of the present crisis: global warming, peak oil, species extinction, world water shortages, global hunger, alternative energy sources, sustainable development, and environmental justice. Foster draws on a unique range of thinkers, including Karl Marx, Thomas Malthus, William Morris, Albert Einstein, Hannah Arendt, Rachel Carson, Vandana Shiva, and Istvan Meszaros. The result is a startlingly radical synthesis, which offers new hope for grappling with the greatest challenge of our age: what must be done to save the earth for humanity and all living species.
